

Clear Creek Fish Habitat Restoration: Matt Brown, U.S. Fish and Wildlife Service

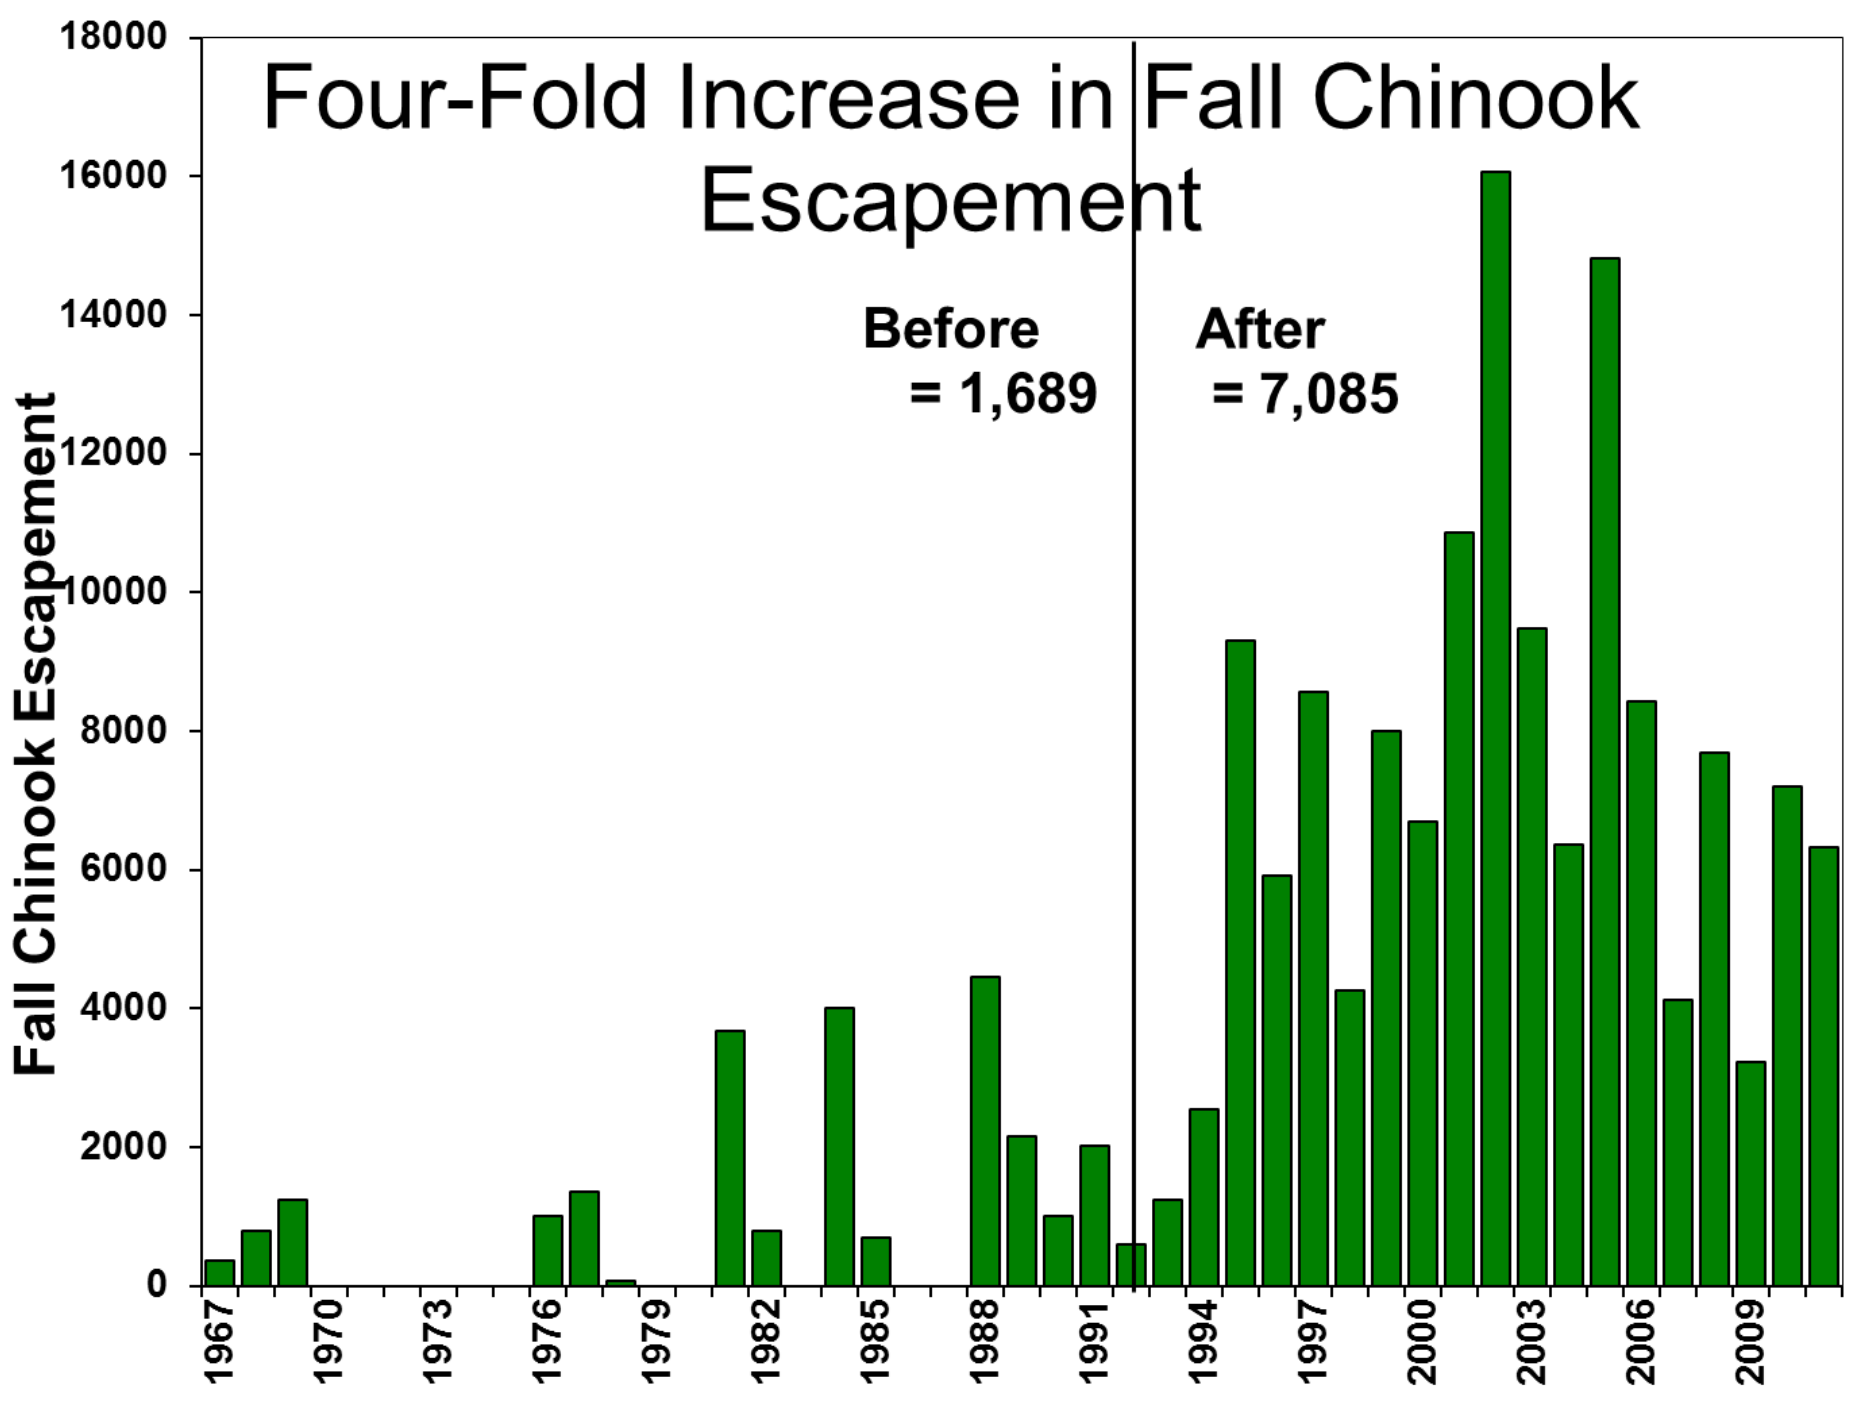

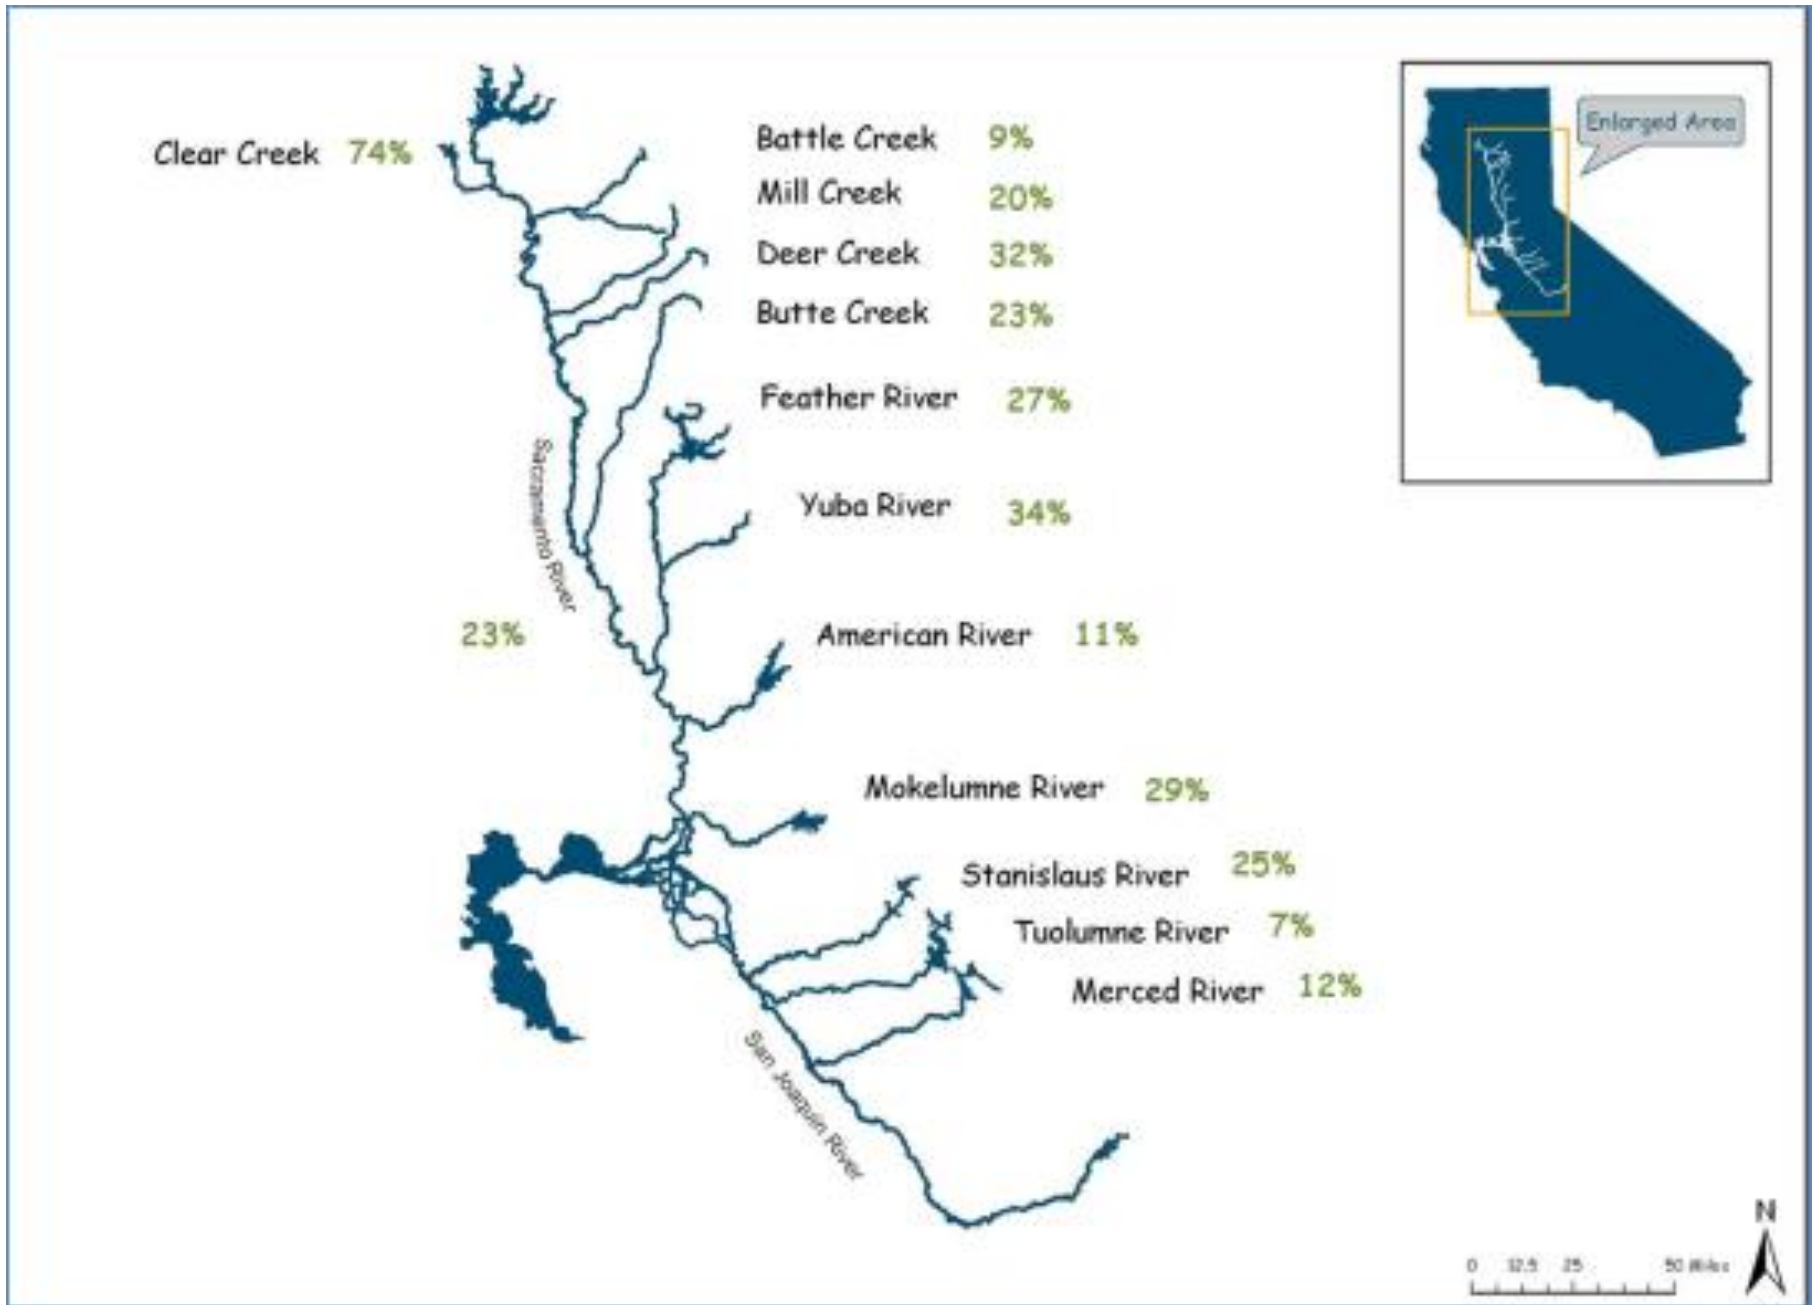

Four-Fold Increase in Fall Chinook Escapement

Before
= 1,689

After
= 7,085

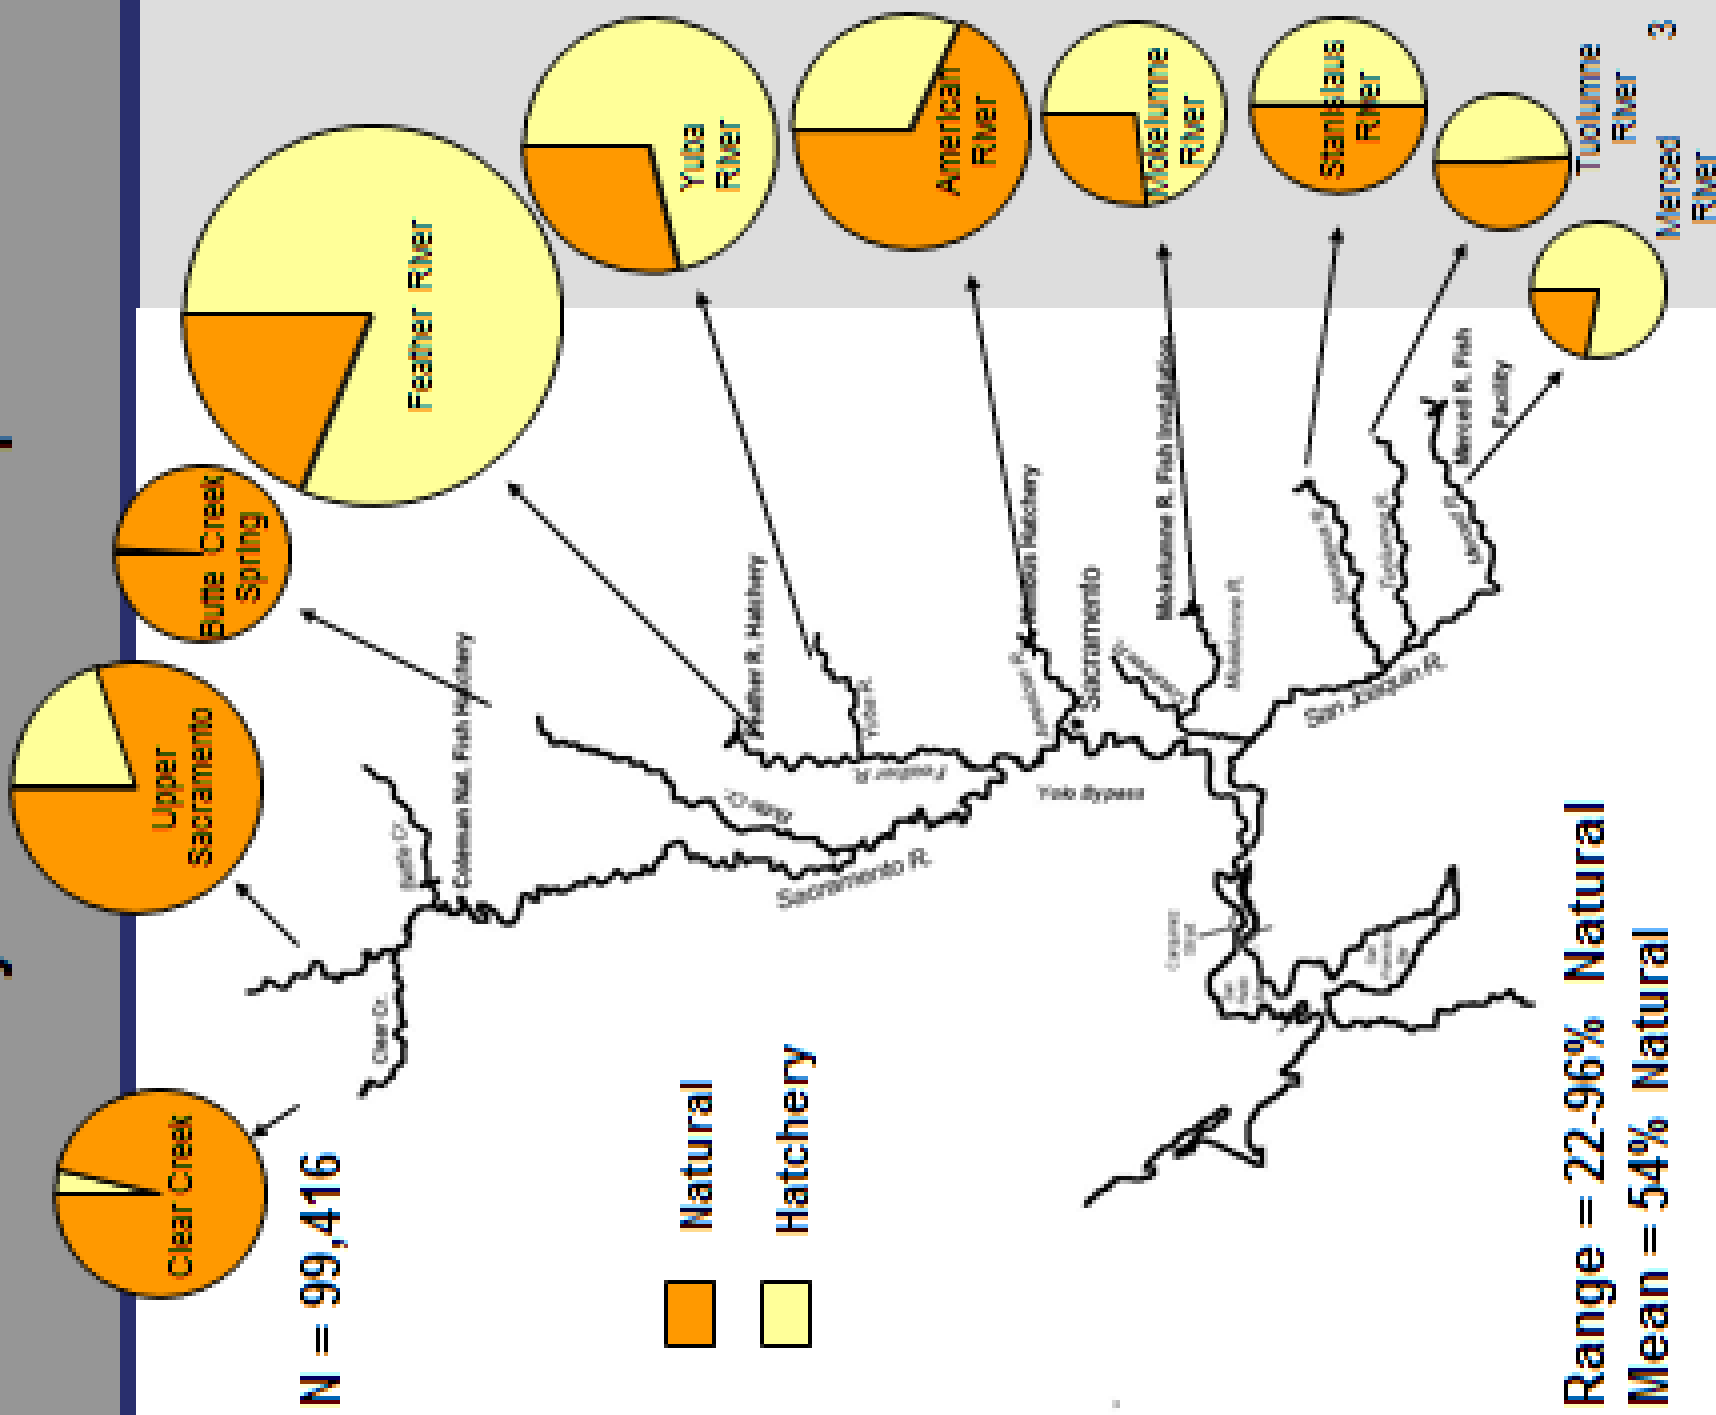

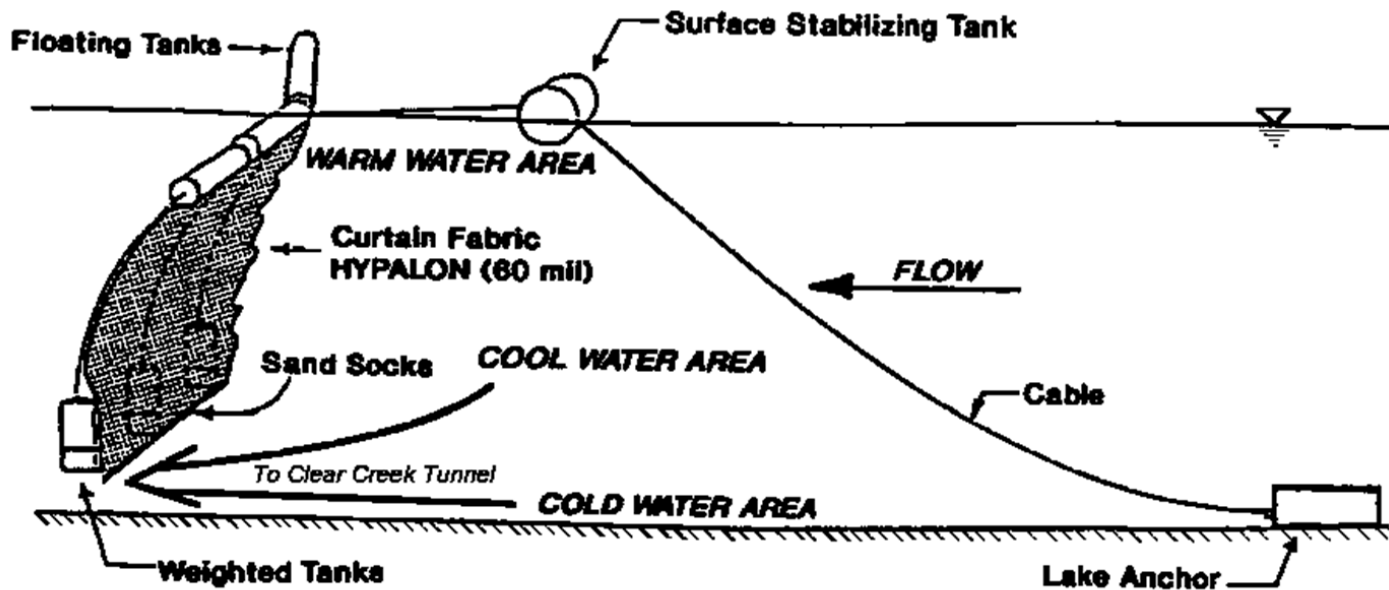

Resiliency: From 2007-2010, the Central Valley fall Chinook salmon escapement estimate was only 24% of the fifteen year average from 1992 to 2006. However, Clear Creek maintained 74% of average, more than any other watershed.
